1. Introduction

1.1 Hunting Tourism Definition

1.2 Sport & Trophy Hunting Development and Its Economic Impact

1.3 Research Objectives

1.1 Hunting Tourism Definition

“A set of activities carried out by individuals who go to a specific place, attracted by the hunting resource, to capture a game sustainably, using different techniques and means.” (**Rengifo Gallego, 2008**).

“Any hunting of a non-human animal in which part of the animal is kept for personal display and souvenir purposes.” (**Bichel and Hart, 2023**).

1.2 Sport and Trophy Hunting Development and Its Economic Impact

- Early practices throughout human history.
- Emergence of sport hunting, trophy hunting and hunting tourism in the 20th century.
- Relationship between **leisure time** and **rural tourism expansion**.
 - **Important economic activities** around the world, particularly in regions with abundant wildlife resources.
 - Dates back to colonial times, has **evolved into a complex industry affecting conservation, rural development and sustainable tourism**.

- Trophy hunting generated gross revenues of \$201 million per year in 23 sub-Saharan African countries covering an area of 1.4 million km². (**Lindsey et al. , 2006**).
- In South Africa alone, trophy hunting generated an economic impact of \$137 million in 2013. (**Di Minin et al., 2016**).
- The **International Union for Conservation of Nature (2016)** report reveals that trophy hunting programmes provide economic incentives in several African countries, with annual revenues ranging from US\$1.1 million to US\$12.2 million, depending on the country.
- In other regions: North America, Europe, and Central Asia, it also generates significant economic value. (**Sharp and Wollscheid, 2009**) although the specific figures vary depending on the region and the analysis methodology employed.

1.3 Research Objectives

- To analyse the **main documents, journals and authors** in the field of *trophy hunting, hunting tourism* and *recreational tourism*.
- To identify **documents with the highest academic impact** through **citation analysis**.
- To evaluate **thematic lines and emerging trends** for future studies through **keyword co-occurrence analysis** and **longitudinal analysis**.
- To identify **documents that have contributed significantly to the theoretical foundations** through **co-citation analysis**.

2. Literature Review

2.1 Evolution of Trophy Hunting Research

2.2 Bibliometric Context of Trophy Hunting

2.1 Evolution of Trophy Hunting Research

1 Early conservationist approaches

Conservation efforts from the 1930s to the 1960s focused on protecting species and habitats, laying the foundations for modern practices.

2 Economic valuation studies

From the 1970s to 1990s, the **economic** impacts of conservation were assessed, integrating financial incentives into preservation strategies.

3 Sustainability debates

The 1990s to 2000s witnessed intense **debates** around sustainability, promoting discussions on balancing ecological and economic needs.

4 Integrated socio-ecological approaches

Since 2000, there has been a shift towards **integrating** socio-ecological frameworks that emphasise the **interconnectedness of human and ecological systems**.

2.2 Bibliometric Context of Trophy Hunting

- The analysis of research on trophy hunting or hunting, or recreational tourism has been partial:
 - *Wildlife biology,*
 - *Tourism studies,*
 - *Conservation and sustainability science,*
 - *Rural economics,*
- This specific field has been tangentially analysed by ***Kanta et al. (2021)*** or ***Parket et al., (2023)***.
- Lack of bibliometric studies focusing specifically on trophy hunting, recreational hunting or hunting tourism.
- **This deficit justifies the present work, which aims to identify patterns and present and future trends in trophy hunting and hunting and recreational tourism research at a more global level.**

3. Methodology

3.1 A dual approach using SLR and BNA for analysis

3.2 Data Collection Process

3.1 A dual approach using SLR and BNA for analysis

Dual Methodology

This study employs a **dual methodology** combining **Systematic Literature Review (SLR)** and **Bibliographic Network Analysis (BNA)** for a thorough analysis.

Comprehensive Analysis

The combination of **SLR** and **BNA** provides a **comprehensive analysis** of secondary data in trophy hunting research, uncovering key insights.

Secondary Data Focus

By focusing on **secondary data**, the study leverages existing research to derive valuable conclusions in trophy hunting tourism.

Patterns and Trends

This methodology reveals significant **patterns and trends** in trophy hunting tourism, enhancing our understanding of this field.

3.2 Data Collection Process

4. Results

4.1 Overview of Tourism Hunting and Trophy Hunting Results

4.2 Performance and Citation Analysis: Main Authors

4.3 Performance and Citation Analysis: Main Journals

4.4 Top Ten Papers by Citations

4.5 Network and Keyword Analysis

4.1 Overview of Trophy and Recreational Hunting Results

656 sources

Diverse Sources

The analysis is based on **656** sources covering a wide range of publications relevant to **trophy hunting tourism**.

1559 documents

Extensive Literature

A total of **1559** documents were evaluated, providing a comprehensive overview of the topic.

2.14% growth

Steady Growth

The annual growth rate of 2.14% indicates a consistent increase in research activities related to **hunting tourism**.

22.94 citations

Citations per Document

On average, each document received **22.94** citations, reflecting the significance of these findings in the academic community.

4184 authors

Collaborative Efforts

The research involves contributions from **4184** authors, highlighting the collaborative nature of studies in this field.

AI BEYOND THE FRONTIERS OF TECHNOLOGY AND KNOWLEDGE

ACIEK UNIVERSITY OF ALCALÁ 2025, June 18-20

4.2 Performance and Citation Analysis: Insights from Top 3 Authors

Top h-index

20

Lindsey, P. leads with an h-index of 20, indicating significant scholarly impact

Total Citations

1924

Lindsey, P. has amassed a total of 1924 citations, showcasing the influence of their work.

Second h-index

19

MacDonald, D. follows closely with an h-index of 19, highlighting their substantial contributions.

Citations Count

1519

MacDonald, D. has garnered 1519 citations, reflecting their research's relevance.

Third h-index

18

Loveridge, A. holds an h-index of 18, indicating notable academic recognition.

Citation Total

1360

Loveridge, A. has achieved 1360 citations, underscoring the impact of their publications.

4.3 Performance and Citation Analysis: Main Journals

Driving themes: highlight the importance of managing hunting activities.

- Wildlife
- Conservation
- Population

Niche themes: ecological concepts and species.

- Habitat structure
- Spatial scale
- Population monitoring

Basic topics: hunting and tourism concepts.

- Hunting
- Tourism
- Outdoor recreation
- Nature-based tourism

Emerging/Declining topics: areas of research that are emerging or declining in importance

- Rural Tourism
- Sustainable development
- Monitoring

5. Conclusions

5.1 Key Insights and Main Contribution of the Work

5.2 Future Directions in Hunting Tourism Research

5.1 Key Insights and Main Contribution of the Work

- Rising interest in **trophy hunting**

There is a growing body of literature exploring the **impact** of trophy hunting on **conservation** efforts and **economic** benefits.

- Key trends in **hunting tourism**

This analysis reveals significant trends within the field, highlighting influential studies that shape the understanding of **recreational hunting**.

- Importance of **responsible management**

Effective management practices are essential to ensure that **ecological** and **economic** advantages are maximised while mitigating negative impacts.

- **Influential works** identified

The bibliometric study underscores key publications that have significantly contributed to the discourse on **trophy hunting** and its implications.

- The contribution of this work to the literature is **to offer a data-driven analysis of different fields**, providing an initial baseline for researchers, practitioners, and policymakers to navigate the complex landscape of trophy and recreational hunting research and practice. In doing so, we have provided an overview of the research landscape on this topic by identifying key trends, influential works, and research niches.

5.2 Future Directions in Hunting Tourism Research

Economic analysis of impacts

This research will assess the **economic** consequences of hunting tourism on local communities and ecosystems, focusing on financial benefits and drawbacks.

Biodiversity conservation integration

Investigating how **biodiversity** conservation can be effectively integrated with hunting practices to enhance environmental sustainability and wildlife protection.

Sustainable trophy hunting policies

The formulation of policies aimed at promoting **sustainable** trophy hunting practices, ensuring ethical standards and ecological balance in wildlife management.

Ethical implications of hunting

A comprehensive study of the **ethical** considerations surrounding hunting tourism, examining moral questions and societal perceptions related to hunting.
